WILD M400 Photomakroskop

Photoadapter for D-SLR cameras

TV-Adapter for c-mount video cameras

The adapter is optimal applicable for the Micro Photography with digital Reflex cameras (D-SLR) and is aligned to the image of the eyepiece.

The following adapters are necessary:

- T2-Adapter (for the corresponding camera model)
- Photoadapter 1,6x for APS-C format cameras or
- Photoadapter 3,2x for full format cameras
- Modification kit for the WILD M400 at Carl- Zeiss Jena dovetail ring

TV-Adapter with different magnification factors are applicable.

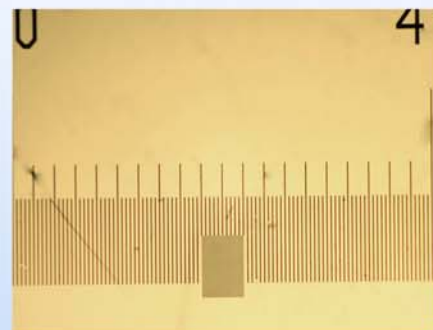

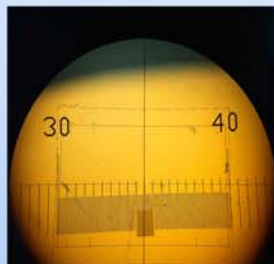

Image of the objectfield at the photo exit

The image of the objectfield meets exactly the format of the eyepiece plate.
