

Mikroskop Technik Rathenow

Automatic positioning stage

for microscopic quality inspection

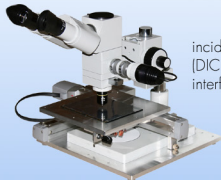

SMD - boards
electronics
etc.

- + simple programming by control software via PC
- + step by step or continuous, automatic drive with any programmable positions
- + transfer & export of detected coordinates
- + adjustable drive speed (max. 600mm/s)
- + variable max. drive length
- + compatible to many microscopes of Mikroskop Technik Rathenow

Control and
quality inspection of
small and zero series!

displays and contact points
(LCD, TFT, OLED etc.)

incident-DIC
(DIC - differential
interference contrast)

Combination with
video microscope!

Comfortable
working via
monitor!
