

Mikroskop Technik Rathenow

Microscope - Service!

Repair and maintenance of stereo- and laboratory microscopes from different manufacturers!

As traditional manufacturer and supplier of microscopes and optical instruments we have the necessary know-how as well as the equipment to repair and maintain microscopes of our own and also from other manufacturers. With our existing machinery, we are able to produce spare parts if they are no longer offered for older microscopes by the manufacturers.

By sending the microscopes and instruments to us and with our free and binding offer, you always have your costs under control! In this way you don't have to pay the costs for a on-site service technician.

Use our experience and competence!

Our offer:

- Repair, cleaning and adjustment of microscopes and other optical instruments
- Enhancement of the existing equipment with additional adapters (photo and video)
- Free telephonic advisory service
- Costs estimate for free when placing the order
- Microscopes will be disassembled, degreased and cleaned, greased again, assembled and adjusted
- Final optical and mechanical function control
- When using original spare parts, we calculate the manufacturer price without additional charge
- 6 months of guarantee

Service - Telephone: +49 3385 - 53 71 0
